Beam 10'6"  
Draft 4'6"  
Displacement 10,500 lbs.  
Ballast 4,200 lbs.  
Sail Area 495 sq. ft.  
Designer Clive M. Dent

Like its predecessor, the Cape Dory 30, the new 30MkII will have a "full-keel" profile and will be characterized by high quality construction and a generous use of teak and bronze. However, this is where the comparison ends . . .

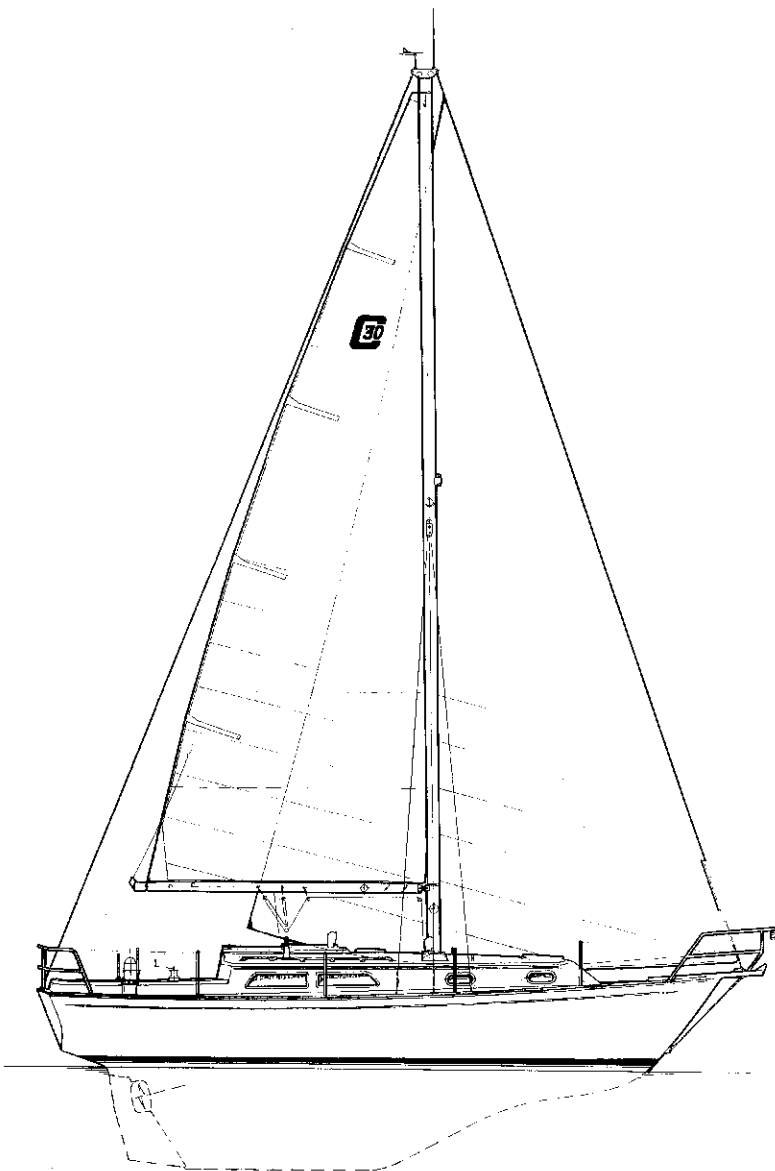

The new CD30MkII's generous beam (10'6") will provide approximately 30% more living space than in the old CD30 models. She will accommodate a family of six comfortably with two private cabins. Such comforts and luxuries as a 'U' shaped galley, and a large head with a separate, sit-down shower stall, are among the features incorporated into the new CD30MkII.

Her 'T' shaped cockpit with molded coamings which has already met with great success on the CD32, 330, 36 and 40. When you slide behind her pedestal wheel, you look forward to an unobstructed, low, modern profile, wide decks and rugged hardware.

Clive M. Dent, Chief Designer at Cape Dory Yachts, Inc., is her proud designer. Clive also designed the CD300 Motorsailer and is working on several other Cape Dory sail and power models.

The CD30MkII will be sloop rigged with a cutter rig available as an option. Clive designed the CD30MkII with a 4'6" draft for excellent windward performance. A 22 horsepower diesel auxiliary provides substantial reserve power for docking or powering.

The CD30MkII . . . built with integrity in the Cape Dory tradition for lasting enjoyment and pride.

**CAPE DORY**  
... a standard of value
